MOUNTING THE FIXTURE (Fig.1)

1. Shut off power at the fuse box or circuit breaker box and remove the old fixture including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts on a clean area. Take care not to misplace any small parts necessary for installation.
3. Loosen screws (K) to remove mounting plate (A) from canopy (L).
4. Determine desired hanging height and thread rods (F1, F2 and F3) to all thread (I) on top of fixture body. Carefully pass wires through each rod during assembly. Secure swivels (G) onto rods (F1).

If your junction box has a ground wire (green or bare copper), connect fixture's ground wire to it. Otherwise, connect fixture's ground wire directly to mounting plate (A) using green screw provided.
8. Tuck wire connections neatly into junction box.

FINISHING THE INSTALLATION (Fig.1)

9. Place canopy (L) over mounting plate (A) and secure with screws (K).

Your installation is now complete. Return power to the junction box and test the fixture.
